Assignment:

The screenshot shows a LibreOffice presentation window with a slide titled "JAVASCRIPT Exercise". The slide features a graduation cap icon on the left. The main content area lists three exercises:

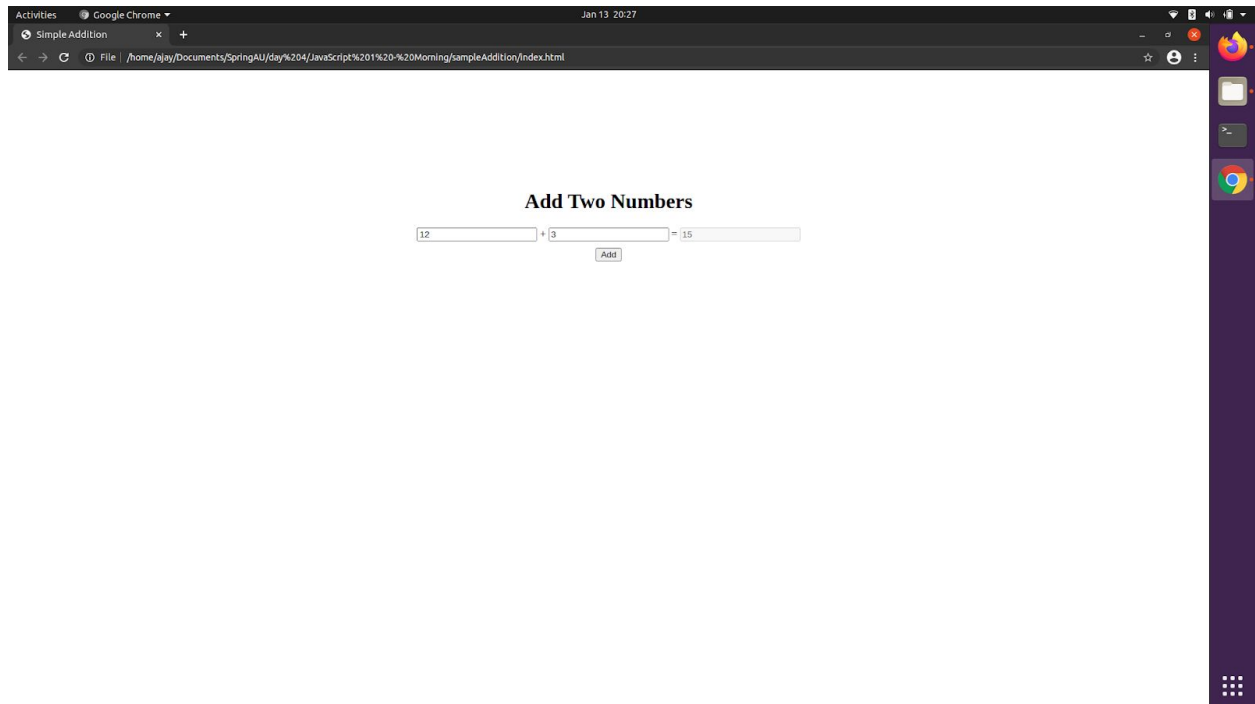

1. Create a sample page with a button on it.
- Clicking the button should show an alert saying 'Hello World'.
2. Create a sample page with a button on it.
- Clicking the button should alert 'Thanks for visiting my site!' and then redirect it to another website.
3. Create a sample page with two text box for input and one text box for output. And One button.
- Clicking on the button should display the result of addition of the two input numbers in the output box.

The presentation interface includes a sidebar with slide thumbnails, a top menu bar, and a bottom status bar. A meeting window from "meet.google.com" is visible in the background.

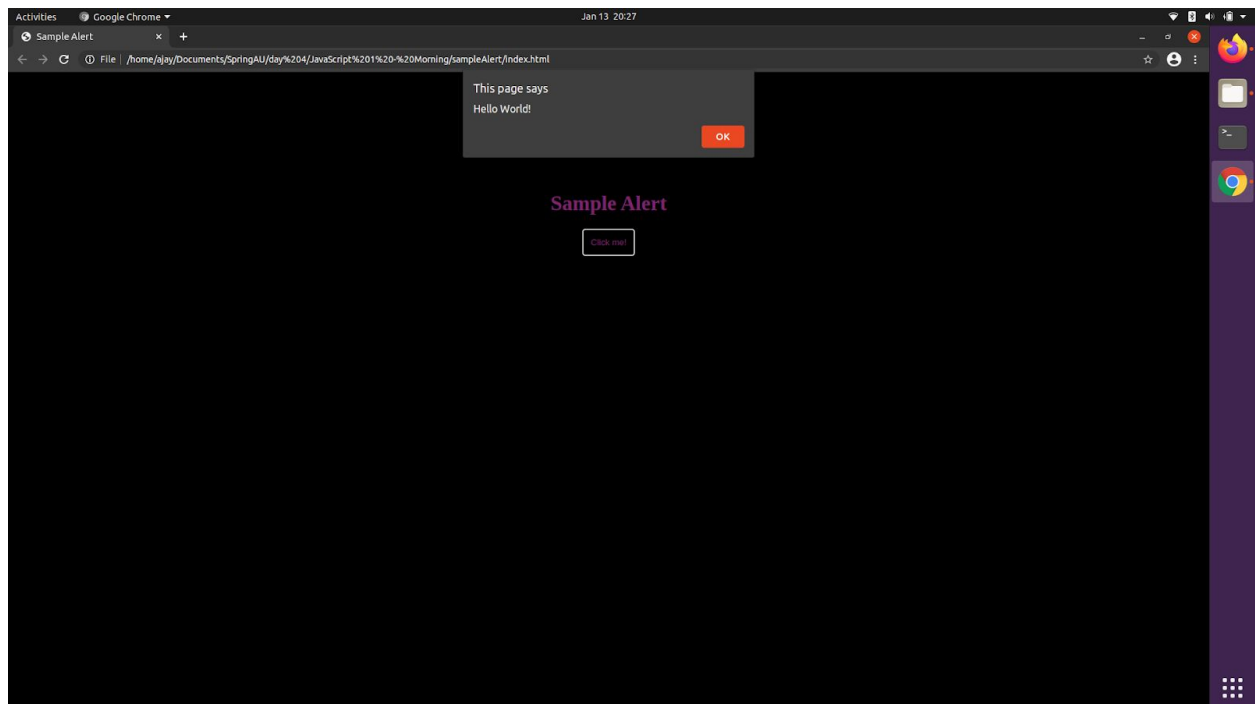

Code for the exercises are added as separate folders
