## React Session 1 & 2 Spring AU 2021

Ajay S

ajay.s@accolitedigital.com

## 1. Clone Object

```
three: '3',
 four: '4',
five: '5'
const wontWorkCopy = demoObject;
const way2 = Object.assign({}, demoObject);
const way3 = JSON.parse(JSON.stringify(demoObject));
```

## 2. Fetch data from API display in Table Code is attached as a separate folder Screenshot:
